Touch Secure – Pair Smart Lock to Amazon Alexa

1. Device Setup

- a. Ensure Touch Secure app is paired with gateway and can be operated through Wi-Fi.
- b. Download Amazon Alexa app and set up the device before start.

2. Add Touch Secure Lock on the Amazon Alexa

a. Tap *plus icon* on the top right corner or *see more* on the bottom right side.

b. Search KFM Plus and find the icon shown as below.
 the Touch Secure app and icon will replace KFM Plus in Q1, 2025

c. Enter your KFM account name and password to login and Tap Authorize to complete device connection. Alexa will connect the device automatically.
